Online Volunteering gives guidance to farmers

Climatic Conditions, lack of water are major irrigation related problems

Financial support and technology are major problems

Irrigation through bore wells is not sustainable since there are chances of them drying up during summer

A farmer uses 75% of water to carry out irrigation

Crop insurance can be made available

Irrigation Techniques should be improved

Half of the users are related to farming and majority are facing problems

Asia, China, Japan have better irrigation technologies in the world

Punjab has better irrigation technologies in the world

Most of the people reside in cities

Says Thinks **SMART** Feels Does

FARMERS

one of the major problem related to farmer's suicide

Unable to pay

bank loans is

Seek financial support from government

Apply for loans to meet their farming needs

Many changed their profession and shifted to cities

When they fail to do these things they commit sucide

Those who are unable to manage their farms gave their lands for lease

Flood irrigation needs more water

Farmers should be given right to decide the price of their products

Proper storage

facility to store

grains must be

made available

Banks are not providing proper financial support

Improving irrigation techniques help farmers

Drip irrigation is the most expensive irrigation
